MAHBUB HASSAN

has successfully completed the online, non-credit Specialization

Sustainable Cities

In this specialization learners develop and hone essential skills for achieving the objective of creating successful sustainable cities through the application of multiple smart growth strategies. These strategies include leveraging public transportation, smart streets, walkability, biking & parking policies. As well as, green space protection, parks, recreational areas & sourcing quality food from local growers, providing a spectrum of housing availability, integration of office, retail & housing spaces, reduction in the urban pollution footprint and others. The specialization also focuses on the evaluation and assessment of real-world case studies of successful smart growth projects in San Antonio, Houston, Chattanooga, and Fairfax County.

William E. Roper, PhD,
P.E., SES, Professor,
